ROXIMA NOVA is a typeface idea I've been working on in various forms since 1981. I originally called it Zanzibar, just because I liked the word. It was nothing more than rough

sketches back then, but the concept for the lowercase was quite similar to how it eventually turned out. The caps came later. ◆ In 1991, I was art director of Business Ethics magazine, where I was using Gill Sans. I liked it, but wished for something a bit plainer and more

modern that still had a geometric feel. Such a face did not seem to exist. Starting from my old Zanzibar idea, I began working on a new typeface to fill this void. I came up with the name Visigothic, since it was modeled somewhat on American "gothic" faces. ▶ Some existing faces influenced the look of Visigothic. I wanted the general proportions and stroke contrast of Helvetica or Akzidenz Grotesk, but with construction and details borrowed variously from Futura, Kabel, the ATF gothics (Copperplate Gothic, News Gothic, Franklin Gothic, etc.) and the U.S. Federal Highway signage typeface. The result was a hybrid; a face combining modern, even-width proportions with a somewhat geometric appearance. ★ I released it through FontHaus in 1994 as Proxima Sans, a family of six fonts-Regular, Medium, and Black with matching italics. I dropped the name Visigothic, first because of its similarity to the name of another recently released font, Visigoth, and, second, it was kind of a bad pun. I chose the name Proxima Sans because it was near to other sans serifs in

## PROXIMA SANS, 1994.

Proxima Sans It was neur to other sans tense letters happened to display some of

the distinctive characteristics of the design. • I had plans to do more weights, small caps, a condensed version, and other ideas. But between lackluster sales, becoming a new parent, and taking on a new full-time job, I found I didn't have the time or energy to continue working on it for a while. ▶ By the early 2000s, I started to get requests to expand the Proxima Sans family and Rolling Stone magazine chose it as part of its redesign in 2003. Encouraged by all this, I went back to work on a new Proxima Sans family even more ambitious than what I had originally planned. • In 2005, I re-released it as Proxima Nova, a family of 42 fonts seven weights and three widths with matching italics. Built from the start with the OpenType format in mind, it featured advanced typographic features like small caps, different figure styles, fractions, and alternate characters, enough to take on the most demanding typographic applications. • Proxima Nova contained other improvements over the original. I reviewed and refined every character. I rebuilt the italics from scratch. I redid the hinting for better on-screen display. The character set grew from 245 up to 699 characters (1435 with the latest version). I kept the special characters from the original, like the arrows and other dingbats, but gave them proper Unicode values, and created proper math symbols in the positions they'd previously occupied. I scrapped and rebuilt the spacing and kerning. As in Proxima Sans, the italics have been optically adjusted to eliminate the distortion caused by simply slanting the letters—true italics, not simple obliques. ▶ It's now been over ten years since I first released Proxima Nova. Since then, I've continued to make improvements and enhancements, such as additional language support, including Vietnamese, Cyrillic and Greek, and have added a new weight-Medium-bringing the total number of fonts in the family to 48. ■ -Mark Simonson

## Proxima Nova Language Support, OpenType & Usage Notes

#### LANGUAGES SUPPORTED

Afrikaans, Albanian, Asu, Azerbaijani, Basque, Belarusian, Bemba, Bena, Bosnian, Breton, Bulgarian, Catalan, Chechen, Chiga, Colognian, Cornish, Croatian, Czech, Danish, Dutch, Embu, English, Esperanto, Estonian, Faroese, Filipino, Finnish, French, Friulian, Galician, Ganda, German, Greek, Gusii, Hungarian, Icelandic, Inari Sami, Indonesian, Irish, Italian, Jola-Fonyi, Kabuverdianu, Kalaallisut, Kalenjin, Kamba, Kazakh, Kikuyu, Kinyarwanda, Koyra Chiini, Koyraboro Senni, Kyrgyz, Latvian, Lithuanian, Lower Sorbian, Luo, Luxembourgish, Luyia, Macedonian, Machame, Makhuwa-Meetto, Makonde, Malagasy, Malay, Maltese, Manx, Meru, Mongolian, Morisyen, North Ndebele, Northern Sami, Norwegian Bokmål, Norwegian Nynorsk, Nyankole, Oromo, Ossetic, Polish, Portuguese, Quechua, Romanian, Romansh, Rombo, Rundi, Russian, Rwa, Sakha, Samburu, Sango, Sangu, Scottish Gaelic, Sena, Serbian, Shambala, Shona, Slovak, Slovenian, Soga, Somali, Spanish, Swahili, Swedish, Swiss German, Taita, Tajik, Tasawaq, Teso, Turkish, Turkmen, Ukrainian, Upper Sorbian, Vietnamese, Vunjo, Walser, Welsh, Western Frisian, Zarma, Zulu

NOTE: Access to extended language features requires application and/or operating system Unicode or OpenType support.

#### **OPENTYPE FEATURES SUPPORTED**

Small Caps from Lowercase, All Small Caps, Standard Ligatures, Stylistic Alternates, Stylistic Sets (00-09), Case-Sensitive Forms, Class-Based Kerning, Proportional Lining Figures, Tabular Lining Figures, Proportional Oldstyle Figures, Tabular Oldstyle Figures, Slashed Zero, Fractions, Ordinals, Superscript, Scientific Inferior, Mark to Base, and Mark to Mark.

NOTE: Access to OpenType features requires application and/or operating system OpenType support.

#### **ALTERNATE CHARACTER ACCESS**

There are nine Stylistic Sets, providing flexible access to alternate characters in Proxima Nova. In applications that support it, the name of the Stylistic Set will be displayed (e.g., "Schoolbook Style"):

Set	Name	Roman	Italic
1	Schoolbook Style	aly⇒αly	$Iy \rightarrow ly$
2	Geometric Sans Style	Ga→Ga	G → G
3	Alternate Uppercase G	G <b>→</b> G	G → G
4	Alternate Roman Lowercase a	a → a	a*
5	Alternate Italic Lowercase a	a*	a → a
6	Alternate Lowercase I	→ [	/ → [
7	Alternate Lowercase y	y <b>→</b> y	<i>y</i> <b>→</b> <i>y</i>
8	Straight Quotes to Primes	'" → ' "	' " <b>&gt;</b> ' "
9	Tabular One with Serifs	1 + 1	1 + 1

\* NO CHANGE

In programs that support Stylistic Sets, more than one Set may be applied at a time. For example, Stylistic Set 1 (the "Primer" Set) could be recreated by applying Sets 4, 6, and 7 all at once.

Note that Stylistic Sets 4 and 5 affect roman and italic differently. If you prefer a two-story lowercase "a" in italic as well as roman, apply Set 5. The roman "a" will keep its normal two-story design because Set 5 has no effect on the roman. Similarly, if you prefer to have a one-story "a" in both roman and italic, apply Set 4 instead, which changes the roman but not the italic.

#### STYLISTIC MAPPING (PLAIN, ITALIC, BOLD, BOLD ITALIC)

In Microsoft Office and other Windows applications, Proxima Nova is broken into smaller "sub-families" that work with the *I* (italic) and *B* (bold) buttons on toolbars.

Only the first member of each group appears in the font listing in such applications and is the "plain" style within that group. The others are "italic," "bold," and "bold italic" respectively:

GROUP 1: Thin, Thin Italic

GROUP 2: Light, Light Italic

GROUP 3: Regular, Regular Italic, Bold, Bold Italic

GROUP 4: Medium, Medium Italic GROUP 5: Semibold, Semibold Italic

GROUP 6: Extrabold, Extrabold Italic

GROUP 7: Black, Black Italic

For example, to use Proxima Nova Bold Italic, choose Proxima Nova Regular from the font list and then click the  $\it I$  and  $\it B$  buttons on the toolbar (or use the keyboard shortcuts). Note: The "bold" button only works with the Regular style. The "italic" button works with all styles.

Stylistic mapping is the same for Condensed and Extra Condensed. Not all applications support stylistic mapping.

Use of stylistic mapping is optional and not necessarily recommended for some pre-press workflows.

## Proxima Nova Supplemental Fonts

#### WHAT ARE "SUPPLEMENTAL" FONTS?

Proxima Nova is a full-featured OpenType font. It has many typographic extras such as small caps, old style figures, and alternate characters. This is great if you are using Adobe Creative Suite 1 or 2, or QuarkXPress 7 (or later), which have solid support for all (or nearly all) the advanced features in OpenType fonts.

Unfortunately, not every application has been updated yet to take advantage of OpenType fonts. Or, you may not be ready to upgrade to a version that has been. Until now, if you used Flash, MS Word, Freehand, earlier versions of QuarkXpress or Adobe applications, you could only use the basic characters in Proxima Nova. (Some non-OpenType-savvy applications can access the extra characters using your system's character palette.)

For this reason, the Proxima Nova supplemental fonts were created. These are also OpenType format, meaning they still have the advantage of a single font file that works on both Macs and PCs. However, some of the standard characters have been replaced with otherwise inaccesssible ones.

#### SMALL CAPS AND OLD STYLE FIGURES

**Proxima Nova ScOsf** gives access to the small cap and old style figure set, including punctuation and number symbols designed to match. These are essentially the same as what you get if, when using Proxima Nova in an OpenType-savvy application, you apply the Small Caps or Old Style Figures features.

#### **ALTERNATE CHARACTERS**

**Proxima Nova Alt** provides access to the alternate forms of the a, f, I, y, and G, including ligatured and accented forms of these characters. These are essentially the same as what you get if, when using Proxima Nova in an OpenType-savvy application, you apply the Stylistic Alternates feature. (Note: In the Proxima Nova Alt Italic fonts, the lowercase a retains the one-story form.)

#### WHAT EXACTLY IS IN THE FONTS?

The standard character set and the two supplemental sets are shown at right. Special characters—the ones normally inaccessible in non-OpenType-savvy applications—are highlighted.

#### WHAT'S THE DIFFERENCE?

The supplemental fonts cover the same character set as the normal fonts, such as other currency symbols, tabular figures, superscript, subscript, fractions, case-sensitive punctuation, ligatures, and many miscellaneous symbols. The difference is that certain OpenType features (small caps, for example) will have the opposite effect if you use them in an OpenType-savvy program, which could be confusing. Use the supplemental fonts only if you must.

## Proxima Nova Supplemental Fonts

#### HOW TO INSTALL THE SUPPLEMENTAL FONTS

The Proxima Nova supplemental fonts are installed the same way as any other fonts and may be installed alongside the standard version of Proxima Nova.

#### **FONT NAMES**

In applications that group fonts according to family, the standard Proxima Nova fonts will be in one group, the Small Caps and Old Style fonts in a second group, and the Alternate Character fonts in a third group. (Condensed and Extra Condensed are also grouped separately.)

The font names follow a consistent pattern to make it easy to find the font you need. For example:

#### SOME OF THE STANDARD FONTS:

Proxima Nova Regular Proxima Nova Bold Proxima Nova Condensed Thin Italic Proxima Nova Extra Condensed Black

#### THE MATCHING SMALL CAP & OLD STYLE FIGURES FONTS:

Proxima Nova ScOsf Regular Proxima Nova ScOsf Bold Proxima Nova ScOsf Condensed Thin Italic Proxima Nova ScOsf Extra Condensed Black

#### THE MATCHING ALTERNATE CHARACTER FONTS:

Proxima Nova Alt Regular Proxima Nova Alt Bold Proxima Nova Alt Condensed Thin Italic Proxima Nova Alt Extra Condensed Black

Note: In some applications (MS Word, QuarkXPress, most Windows applications), the font names may be abbreviated.

#### **USING THE FONTS**

In general, use these the same way you would use any other separate fonts together. That is, select the text you wish to change an choose the font from the font menu.

It was about ten feet high in the center and about thirty feet in diameter and shaped like a half rubber ball, tapering down to a three foot thickness on the side. I believe I was under and near it for about three minutes. It was only ten feet from the ground. It made a hissing sound like a tire going down." Desverges said that from the object a flare was shot at him which seemed to float slowly towards his face. "When I awoke" he added, "I had no sense of feeling." A Deputy Sheriff reports that the hairs on Desverges rams had been singed and tiny holes burned in his cap. There was some scorched ground near the spot. When Desverges came from the woods he is said to have

A BALL OF FIRE said to have knocked out a 30-year-old Scout Master, has sent the Air Force Flying Saucer Investigation Squad to Florida. There it has been told a strange story by ex-marine Scout Master D.S. Desverges, who says he was going home with three scouts when he saw flashes of light in a wood. Going to investigate, he saw "an object large enough for six or eight men to stand in. It was about ten feet high in the center and about thirty feet in diameter and shaped like a half rubber ball, tapering down to a three foot thickness on the side. I believe I was under and near it for about three minutes. It was only ten feet from the ground. It made a hissing sound like a tire going down." Desverges said that from the object a flare was shot at him which seemed to float slowly towards his face. "When I awoke" he added, "I had no sense of feeling." A Deputy Sheriff reports that the hairs on Desverges arms had been singed and tiny holes burned in his cap. There was some scorched ground near the

A BALL OF FIRE said to have knocked out a 30-year-old Scout Master, has sent the Air Force Flying Saucer Investigation Squad to Florida. There it has been told a strange story by ex-marine Scout Master D.S. Desverges, who says he was go ing home with three scouts when he saw flashes of light in a wood. Going to investigate, he saw "an object large enough for six or eight men to stand in. It was about ten feet high in the center and about thirty feet in diameter and shaped like a half rubber ball, tapering down to a three foot thickness on the side. I believe I was under and near it for about three minutes. It was only ten feet from the ground. It made a hissing sound like a tire going down." Desverges said that from the object a flare was shot at him which seemed to float slowly towards his face. "When I awoke" he added, "I had no sense of feeling." A Deputy Sheriff reports that the hairs on Desverges arms had been singed and tiny holes burned in his

A BALL OF FIRE said to have knocked out a 30-year-old Scout Master, has sent the Air Force Flying Saucer Investigation Squad to Florida. There it has been told a strange story by ex-marine Scout Master D.S. Desverges, who says he was going home with three scouts when he saw flashes of light in a wood. Going to investigate, he saw "an object large enough for six or eight men to stand in. It was about ten feet high in the center and about thirty feet in diameter and shaped like a half rubber ball, tapering down to a three foot thickness on the side. I believe I was under and near it for about three minutes. It was only ten feet from the ground. It made a hissing sound like a tire going down." Desverges said that from the object a flare was shot at him which seemed to float

Des verges said that from the object a flare was shot at him which seemed to float slowly towards his face. "When I awoke" he added, "I had no sense of feeling." A Deputy Sheriff reports that the hairs on Desverges arms had been singed and tiny holes burned in his cap. There was some scorched ground near the spot. When Desverges came from the woods he is said to have looked like a wild man. The scout master's
